

# The Mustafa Zamani Centers

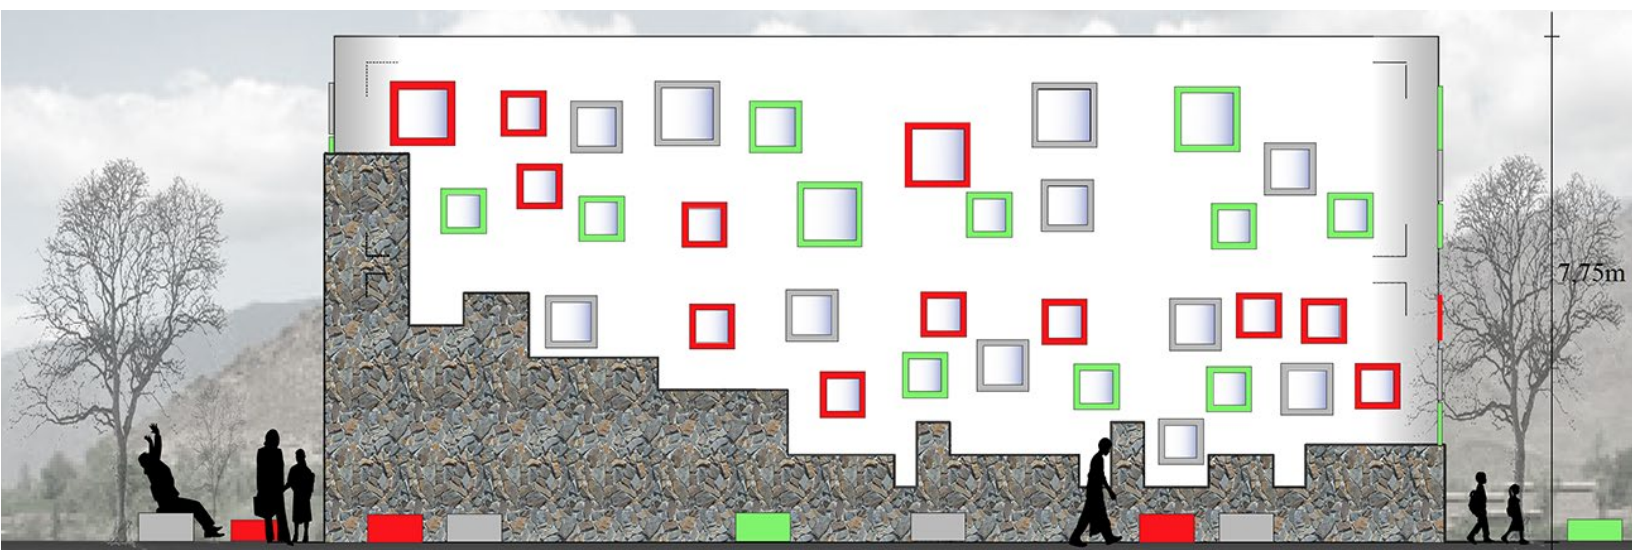

A Mustafa Zamani Center is the product of a bold re-imagining of personal, private philanthropy and active community involvement.

It is a newly constructed, local building whose resources are primarily dedicated to the educational enrichment of the young. However, the Center also serves as a community gathering place, and offers a dedicated space to share knowledge on topics that are of the greatest interest to the local community – such as various vocational arts, computer studies, and language training.

## Mustafa Zamani envisions a national network of Centers – each of which will be locally operated and maintained.

---

Each of the 34 provinces of Afghanistan will have at least one Center. By making a significant contribution of his personal funds to this endeavor, Mustafa is realizing a life-long dream of giving back to his motherland and fostering a spirit of education, hope, and peace in Afghanistan.

**Together, we will build a better world.**

” Education breeds confidence.  
Confidence breeds hope.  
Hope breeds peace.
